

MIG + TIG WELDER

Description:

Our company's Fabricator/Welder will be responsible for making and repairing parts used in the assembly of machinery. This position will require working with blueprints, standardizing material and performing welding, cutting and grinding operations. A successful candidate for this job will be able to work independently, meet necessary deadlines and adhere to safety standards.

Responsibilities:

1. Use CAD program to lay out parts before fabrication.
2. Cut and bend metal to shape with hand tools and power tools.
3. Fabricate components from design documents.
4. Use a variety of weld joints to join components.
5. Apply surface treatments to weldments.
6. Be familiar with commercial applications for the steel industry.
7. MIG/TIG welding.
8. Work with stainless steel and aluminum.
